SUMMARY

Software Developer seeking to grow into a well-rounded professional by continuing to learn and strengthen technical skills in a collaborative environment. Hands-on experience in C#, Java, SQL, and web development, with an A.A.S. in Computer Programming Technology and certifications in Software, Java, and Mobile App Development. Skilled in creating real-world applications using Visual Studio, IntelliJ, Unity, and databases such as MySQL and SQLite. Backed by nine years in leadership and customer service, bringing strong communication, problem-solving, and adaptability. Looking for a long-term role with a supportive team where I can contribute meaningfully, learn from experienced developers, and take on increasingly complex projects over time.

EDUCATION & CERTIFICATIONS

[Texas State Technical College](#) - A.A.S in Computer Programming Technology

Graduated Aug 2025 · GPA: 4.0

WORK HISTORY

[The Social House, Fort Worth TX](#) - *Leader Server / Key Manager*

Mar 2021 - Present

- Supervised and trained staff, promoting a collaborative work environment and ensuring consistent performance in a high-pressure setting.
- Managed daily operations including sales reporting, cash handling, and customer service, requiring accuracy, attention to detail, and problem-solving under tight deadlines.
- Adapted quickly to shifting priorities and resolved issues efficiently to maintain operational flow and customer satisfaction.

[Texas Roadhouse, Mansfield TX](#) - *Server Trainer*

Jun 2016 - Mar 2021

- Trained and mentored new team members in company procedures, customer engagement, and efficiency standards.
- Recognized for reliability, teamwork, and leadership, consistently supporting colleagues in high-volume, fast-paced operations.

PROJECTS

[Keyboard Vault](#) - *Inventory & POS Application*

C# · SQLite · Windows Forms

Developed a desktop-based inventory and POS system for the consumer electronics industry as the final project for my A.A.S. in Computer Programming Technology. Features include role-based login, secure account creation, real-time stock updates, shopping cart, returns processing, and HTML-based managerial reports. Implemented multithreading to improve performance and ensure a responsive UI during intensive operations.
